Electricity from renewable energy sources

This document verifies that the electricity sold by Swedavia has been produced using renewable energy sources.

Swedavia purchases guarantees of origin (GO) issued by the Swedish Energy Agency in order to secure this.

The renewable energy sources are wind, solar and geothermal energy, wave energy, hydroelectric power, or biofuels.

Swedavia is, since 2015*, committed to supply electricity only from renewable sources. This commitment applies to all by Swedavia sold electricity and includes all Swedavia airports.

This certificate is valid until further notice.

* At the latest.
