

# District heating from renewable energy sources

This document verifies that the district heating energy sold by Swedavia has been produced using renewable energy sources.

Swedavia distributes heating from external district heat providers and from own heat production systems.

Swedavia guarantees that all heating distributed by Swedavia is based on renewable energy sources.

Swedavia is, since 2019\*, committed to supply heating only from renewable sources. This commitment applies to all by Swedavia sold heating and includes all Swedavia airports.

This certificate is valid until further notice.
