

Safety Alert

Stockholm Arlanda Airport
Safety Alert 59

Winter conditions

The winter weather brings additional risks. In order to prevent accidents staff working at the airport need to act with awareness and caution.

Consider the following to reduce the risk of accidents

- Reduce speed – **in slippery weather, the braking distance will be much longer.**
- Be extra careful when walking – **there may be ice under the snow.**
- Facilitate snow removal – **if the equipment is not in the intended place, snow removal will not be optimal.**
- If possible - start snow removal and anti-slip work yourself.

Regarding snow removal

- For general questions regarding snow removal on Airside, contact the Snow Coordinator tel. 010-109 15 00.
- If help is needed with snow removal at gates and stands,
- contact the Winter Coordinator tel. 010-109 10 53
- For more information - see Snow Plan 2023/2024 on the extranet.
