

Safety Alert

Stockholm Arlanda Airport 2024-12-11
Safety Alert 64

Winter conditions

Winter weather brings additional risks, requiring awareness and caution from airport staff to prevent accidents.

Consider the following to reduce the risk of accidents:

- Reduce speed – **braking distances are much longer on slippery surfaces.**
- Be cautious when walking – **there may be ice hidden beneath the snow.**
- Facilitate snow removal – **if the equipment is not in its intended place, snow clearing will be less effective (this also applies to cones, chocks and cables).**
- If possible – start snow removal and anti-slip measures yourself.

Regarding snow removal:

- For general questions about snow removal on Airside, or if you need assistance with snow clearing at gates and stands, contact the snow coordinator at +4610-109 15 00.
- For more information – see the 2024/2025 Snow Plan on the Extranet.

SAFETY FIRST!
